HUMMINGBIRD

ENHANCED MIGRATION MEASURES FROM A MULTIDIMENSIONAL PERSPECTIVE

- Project is financed in call
  - MIGRATION-01-2019 Understanding migration mobility patterns: elaborating mid and long-term migration scenarios

- Problem Statement:
  - A deeper understanding of the root causes and drivers of migration and of their interrelation with people's propensity to migrate is needed as well as projections and scenarios that are essential for appropriate planning and effective policymaking.

HUMMINGBIRD

ENHANCED MIGRATION MEASURES FROM A MULTIDIMENSIONAL PERSPECTIVE

▶ The project's overall objective is to improve understandings of changing nature of migration flows and the drivers of migration, to analyse patterns, motivations and new geographies.

▶Projects ambitions are to identify the uncertainties and reappraise, to explore the reasons why migration predictions may not hold and to demonstrate non-traditional data sources for migration research.

HUMMINGBIRD

ENHANCED MIGRATION MEASURES FROM A MULTIDIMENSIONAL PERSPECTIVE

- HUMMINGBIRD will
  - identify the uncertainties and reappraise
  - explore the reasons why migration predictions may not hold
  - conceptualise “Hubs of Migration”
  - listen to the migrants on the way to understand the root causes of migration
  - use Big Data as proxies for migration measures
  - examine possible future implications of today’s policy decisions
